Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 April 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mabbot (# US 2004/0090507) in view of Smith et al. (# US 5084309).

Mabbot discloses a method of providing a surface of a material with an image, the method comprising applying to the surface an image sheet comprised of (i) a flexible layer of a Shape Memory Polymer ([0008], [0015]-[0021]), and (ii) an image bonded to said layer by means of an image key coat (laminating), and bonding said image sheet to the surface by means of an adhesive ([0044]) and a process which involves heating of the SMP to a temperature above its Glass Transition Temperature ([0012]-[0014]). They also discloses that the SMP has a glass transition temperature 25-45 degree C ([0013]), and has a thickness of 20 to 60 micron ([0028]).

Mabbot discloses all the limitation of the method of providing a surface material with image except (1) The material is leather. (2) The adhesive for bonding the image sheet to the material is a heat activated adhesive which is activated at a temperature 2-3.degree. lower than the Glass Transition Temperature of SMP.

Smith et al. teaches that to have the better adhering property, use vinyl plastic or leather material.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the surface material of Mabbot by the aforementioned teaching of Smith et al. in order to have a better adhering property, which gives high quality image.

It would have been obvious to one having ordinary skill in the art at the time of invention was made to incorporate the adhesive for bonding the image sheet to the material is a heat activated adhesive which is activated at a temperature 2-3.degree. lower than the Glass Transition Temperature of SMP, since it has been held that it is not inventive to discovering and optimum value or workable ranges by routine experimentation. *In re Aller*, 105 USPQ 233 (CCPA1955).

Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
